

**Berblinger
Wettbewerb
Competition
2013 Ulm**

The City of Ulm presents the

Berblinger Prize 2013

for the participation in
the Berblinger Competition to

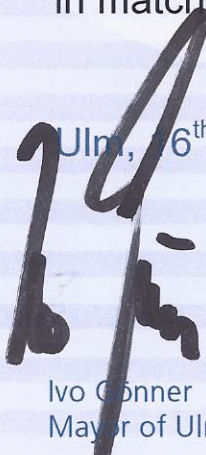

Eric und Irena Raymond, Ramona (CA, USA)

for their project submitted to the competition

Sunseeker Duo

Construction of a two-seater, self-launching motor glider with a solar-powered electric motor, tricycle landing gear and in-flight adjustable centre of gravity. The Sunseeker Duo is the logical next step in the development of solar-powered aircraft. The project combines a large number of great ideas in a sophisticated overall design and is based on its designer's many hours of experience flying solar-powered aircraft. Thus, an emission-free Danube Flight could well be a reality in the future in matching weather conditions.

Ulm, 16th November, 2013

Ivo Gönner
Mayor of Ulm

Prof. Dr.-Ing. Otto Künzel
Chairman of the Berblinger Jury
